**DETAILED ACTION**

**Information Disclosure Statement**

The prior art cited in the information disclosure statement (IDS) submitted on 02/10/2004 has been considered.

**Allowable Subject Matter**

Claims 1 -10 are allowed.

The following is an examiner's statement of reasons for allowance:

With regards to claims 1 and 6, the prior art of record does not disclose or suggest a radiation detector comprising a light guide formed of a lattice frame member that is integrally formed with a cured liquid resin wherein, the lattice frame member forms partition walls in the cured liquid resin to provide compartments. While aspects of the prior art do address radiation detectors wherein, the light guide is disposed between the scintillators and the photoelectron multipliers, the prior art is further silent with regards to a lattice frame integrally formed with the cured liquid resin and constructing partition walls once the liquid resin sets.

References, such as Cherry *et al.* (US Patent 6,552,348 B2) discloses a light guide that was cut into individually tapered light guides, wherein the individual cut light guides would match the scintillation crystal array and the active face of the PMT, teaching away from the applicant's discloser. Cherry fails to suggest any modifications to include a lattice frame integrally formed with the cured liquid resin.

As such, applicant's disclosure provides a novel and nonobvious improvement over the prior art. Accordingly, claims 2-5 and 7-10 are allowable because they further limit claims 1 and 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saitoh *et al.* (US Pub. 20030099118 A1) discloses a light guide made by cutting acrylic resins.
